Update on Sylvan Township Water

It has been a busy 24 hours!

Our water testing has come back clean, so that is good news. We also were able to get expedited shipping for new chemicals to the plant, as the current barrels could not be used since they may be compromised. Furthermore, EGLE has requested the water be purged from the water tower since we cannot be certain it was not compromised.

We are hopeful that by tomorrow afternoon ELGE will give us the all clear and we can return to our normal routines. Once that happens, the Washtenaw County Emergency staff said they will send out a Notice again, and it will be hand delivered to those affected.

Please know there are cases of bottled water at the Township Hall for those affected by this. If you know of someone that is homebound or unable to get to the water, please let me know and I will deliver it to them.

I can be reached via email at supervisor@sylvantownshipmi.gov.

Respectfully,

Kathleen Kennedy

Sylvan Township Supervisor
